Betreff: CEN/TC226/WG3/PT1A - Request for input from national mirror groups
Anlagen: CEN-TC226-WG3_N0287_Request_for_input_from_national_mirror_c.pdf

Dear Miss Panek,

After consultation of the members of the Belgian mirror group for CEN/TC226/WG3, we prefer option 3 from the document in annex (i.e. a new test method and a sufficient number of new classes)

We also find it important that:

- the visual performance of the new classes is comparable with the visual performance of the new classes. When replacing a sign, we think it is important that the visual performance of the new sign is not too different from the old one.
- there should be a sufficiently clear distinction between the visual performance of sheetings that are classified in a different classes. Classes should also be sufficiently narrow to avoid that visually significantly different sheetings can be classified in the same class.

I hope this answer is sufficient for you. Please do not hesitate to ask additional info (to me or to one of the Belgian experts in WG3)

Best regards

kris
