

Opinion of the German mirror committee to CEN/TC 226/WG 3:

The members of the German mirror committee to CEN/TC 226/WG 3 agree to Option 1b as an interim solution. This option is preferred because it provides a timely solution to replace the EAD/ETA procedure and leads to a practicable, quick result. This option could comprise a collation of the single tables of the former CUAP into one table. The preference of Option 1b however should not hinder further work on new classes and on a new standard with a new testing method. The elaboration of this document should be continued

On behalf of the German mirror committee to CEN/TC 226/WG 3 (NA 005-10-23 GA)

Lilian Panek
